Film Processing

We process all three film types (C-41, B&W, E-6) using Tru Trak hanger transport machines. These dip and dunk systems ensure clean and consistent results, with time, temperature, agitation and replenishment all accurately controlled. With our commitment to the highest standards of quality, control strips are run first thing in the morning and densitometrically measured for accurate color balance, correct film speed, clean whites (D-min), and rich blacks (D-max). By delicately adjusting the chemistry pH, specific gravity, time, and temperature, we are able to keep the control limits within very strict parameters. The result is accurate, consistent film processing time and time again.

Film Format	C-41	B&W	E-6 sleeved	E-6 mounted
35mm - 24 exp.	7.50	8.50	9.00	9.75
35mm - 36 exp.	7.50	8.50	10.75	11.75
120	7.50	8.50	9.50	
220	13.00	14.50	16.00	
4x5	3.75	3.75	3.75	
5x7	7.00	7.00	7.00	
8x10	9.00	9.00	9.00	

• 50% Discount

on all film processing when ordered with Photofinishing or Full Roll Film Scans. This includes E-6.

e-mail or FTP

selected images that you or your client may need right away.

Find a complete description of these services throughout the price list.

TURN-AROUND **Process Only**

- We process film every Tuesday & Friday.
 - Film dropped off by 10:00am on Tues. will be ready at 10:00am on Wed.
 - Film dropped off by 10:00am on Fri. will be ready at 10:00am on Mon.
-

Attention E-6 Shooters - You can now enjoy proofing options that were once relegated only to the world of negative films. The Fuji Frontier excels with slide and medium format transparency films. Index prints, proof prints, conversion to B&W, scans, and burn to CD are not only possible, they are phenomenal. To get the best full roll proofing prices the film must be un-cut/un-mounted, so when in doubt specify "DO NOT CUT". We can always send the 35mm slide film back for mounting after any printing/scanning work is done.

Prices are subject to change.
