Individual Film Scans

The Fuji SP2000 film scanner is nothing short of amazing. Don't let the inexpensive prices fool you, these scans are absolutely top quality. The only way to get better film scans is with our Premium Film Scans service. The key to top quality scanning is in the "preview" step before the actual scan is made, here we adjust color, density and contrast to achieve optimal results. For an additional fee we can "clean-up" the scan to eliminate dust specs at actual pixel size magnification, re-name images with your designated titles, reformat image to a specific size/crop or color profile, burn to CD, send via email, or upload on FTP. When ordering, remember you can always downsize a scan that is too large, but if a scan is too small the image quality will be compromised.

Available From:

- 35mm film
- Medium format film
(6x4.5, 6x6, 6x7, 6x9)
- Color or B&W
- Negatives or Slides / Transparencies
- For flat art or oversize film scans see "Flatbed Scans".
- For restorative work see "Digital Restorations & Retouching".

Options & Extras:

- Files saved as RGB Jpeg or Tiff
- Convert to another file type - \$1.50 per image
- CD Burn (includes media) - \$6.00
